### Description

The FG-EDFA Series, Erbium Doped Fiber Amplifiers (EDFA) is designed for use in CATV, FTTx and HFC (Hybrid Fiber -Coaxial) application. It is optimized for 1550nm wavelength and is packaged in a 2U 19" rack housing. The product offering is flexible enough to perform all the requirements of CATV, FTTx and HFC applications. The device chooses a high-performance PUMP laser and circuit (include ACC and APC) and optical output power is adjustable and flexible for network link loss budget. The FG-EDFA series also provide monitors and associated alarms for all vital characteristics. The status and management of the device can be monitored and managed either from the VFD front panel display or remotely via Ethernet based-SNMP. The device also supports multiple output by build-in PLC splitter and FWDM (1310nm/1490nm) optical multiplexer for Triple-play FTTx network applications.
